Dear Sirs,

For vehicles which are constantly in special service, as for instance vehicles of the Police Force etc., we have effected the release of an intermediate lever support, which differs from the standard type by the additional insertion of a damper.

We leave it up to you to use this intermediate lever support also for vehicles which are in private hands and also in aggravated service. For example for vehicles, which are dominantly used on bad roads or suchlike.

We enclose the German edition of this circular to show the installation drawing for all particulars in question. Please direkt your orders to our Spare Parts Works.
