

**Trailer Towing Attachment  
"Isabella"**

Bremen, Germany  
February 2nd, 1959

To all authorized BORGWARD Dealers and Workshops

Gentlemen:

As is known, a trailer towing attachment for our type "Isabella" is supplied by Messrs. Westfalia-Werke, Wiedenbrück/Westfalia.

In our Service Bulletins Allg. 1/127 and 136 we have pointed your attention to the possibility of delivery.

This towing device, which is supplied as

"Trailer Towing Attachment for Borgward "Isabella", type II",

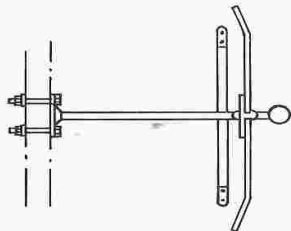

is the only type which has been released by the Works.

Some time ago we learned that a further type is supplied by Messrs. Westfalia-Werke, which has not been released by the Works. This towing attachment is supplied as type I and must by no means be fitted to our type "Isabella". We strongly warn you to use this device since succeeding appearances may result which prevent troublefree operation of the vehicle.

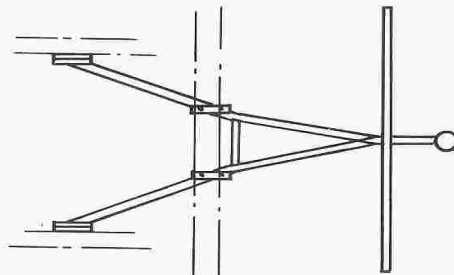

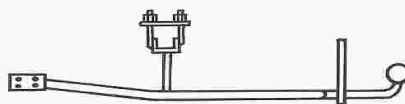

For your information please note the external differences of these two trailer towing attachments as shown below.

Please observe these instructions when fitting a towing attachment.

Trailer Towing Attachment for "Isabella"

Type 1  
(Not released!)

Type 2  
(Can be fitted.)

Yours very truly,

Carl F. W. BORGWARD G.m.b.H.  
Technical Service Department
